Tech Manager CyberTrust

Apply Now

Company: Devoteam Luxembourg

Location: Luxembourg

Category: other-general

Description du poste

Devoteam is seeking an experienced individual to join our dynamic team as a Tech Manager for CyberTrust. This role is instrumental in leading the design, development, and implementation of cutting-edge CyberTrust and Compliance solutions internally and for our customers. You will be working from our 2 state-of-the-art offices (Windhof and Clausen), and at our clients'.

Your responsibilities:

Solution architecture leadership:

Lead the design and development of innovative CyberTrust and Compliance solutions

Collaborate with cross-functional teams to ensure alignment with client requirements and industry best practices

Provide technical guidance and mentorship to project teams on Security and Compliance best practices

Provide monitoring and technical decision-making on all cybersecurity projects and subjects, both internally and with customers

Provide technical and moral support to the team to ensure high-quality project delivery

Develop and implement secure processes and systems used to prevent, detect, mitigate, and recover from cyberattacks.

Client engagement:

Act as the primary contact for clients regarding CyberTrust and Compliance initiatives

Ensure successful implementation and adoption of CyberTrust solutions, addressing client needs effectively.

IT Security management:

Take charge of the IT security aspect of the internal infrastructure, ensuring optimal security in compliance with relevant regulations (CSSF)

Develop and drive a cybersecurity strategy and framework, with initiatives to secure the organization's cyber and technology assets

Continuously evaluate and manage the cyber and technology risk posture of the organization

Implement and manage the cyber governance, risk, and compliance (GRC) process

Investment management:

Develop, justify, and evaluate cybersecurity investments to ensure alignment with organizational goals and priorities.

Training and Awareness:

Develop and implement ongoing security awareness training and education for users to promote a culture of cybersecurity within the organization.

Presales:

Collaborate seamlessly with Presales teams on all CyberTrust presales activities. Facilitate the redaction, evaluation, formatting, and logistics of Requests for Proposals related to CyberTrust

Collaborate with Sales and Presales team to defend, pitch and facilitate the signing of new business.

Qualifications

Bachelor's or Master's degree in Computer Science, Information Technology OR related CyberTrust experience on the field (3+ years)

Proven experience in leading the design and implementation of CyberTrust and Compliance solutions within Microsoft Cloud portfolio (focus on M365 and Azure)

Strong understanding of security and compliance frameworks, regulations, and best practices (Focus on CSSF, CAA, NIS, NIS2, DORA, GDPR, ISO27001)

Excellent communication and interpersonal skills, with the ability to engage effectively with clients and internal stakeholders

Leadership experience, with a demonstrated ability to mentor and coach team members

Experience in pre-sales support, bid management, and client relationship management is a must

Certifications such as CISSP, CISA, or CISM are a plus

Fluency in both English and French is required.
